

## Wen-Huai Tsao, Ph.D.

Coastal Ecosystem Design Studio, Louisiana State University

whtsao@lsu.edu | +1 512-300-6414

### Education

---

#### Ph.D. – Civil Engineering | National Taiwan University | January 2018

Dissertation: Study on nonlinear liquid sloshing behavior and its application on tuned liquid damper by regularized boundary integral method

Advisor: Dr. Yung-Hsiang Chen and Dr. Wei-Shien Hwang

#### B.S. – Civil Engineering | National Taiwan University | June 2009

### Expertise and Skills

---

#### Civil, Coastal, and Ocean Engineering

- Wave-structure interaction; Vibration control technology; Shaking table test
- Computational fluid dynamics; Water waves; Wave flume experiment
- High-performance computing

#### Program Development

- Expertise in code development with **Fortran** and **MATLAB**
- Expertise in code development of open-source toolkit **Proteus (Python)**

#### Scientific Toolkits

- Experienced in **Fluent** (CFD), **Tecplot 360**, **Praview** (post-processing), **EDEM** (granular material)
- Exposure to **ETABS** (building), **SACS** (offshore), **OpenFAST** (wind turbine), **Project Chrono** (multibody)
- Linux, Mathematica, AutoCAD, LabVIEW, Microsoft Office

### Professional Experience & Executed Projects

---

#### IT Consultant | 2023 – Present

Coastal Ecosystem Design Studio, Louisiana State University, USA

##### Project: Anticipating Threats to Natural Systems, ERDC US Army, USA

- Develop physical/digital twins for solving coastal ecosystem design and resilience of Louisiana areas.
- Develop high-performance computational toolkits for air/water-structure interactions and perform uncertainty quantification for solar and wind energy facilities.

#### Postdoctoral Researcher | 2021 – 2023

Department of Civil and Environmental Engineering, Louisiana State University, USA

##### Project: *Proteus*: Coastal, Marine, and Riverine R&D, LSU, USA

- Implemented multiphase Navier-Stokes model and potential flow model in *Proteus* to solve stability of large floating structures in waves. Tuned liquid dampers were modified to enable capability in heave control.
- Successfully accomplished the initial phase of constructing a physical wave flume.

#### Visiting Scholar | 2019 – 2021

Department of Civil, Architectural and Environmental Engineering, The University of Texas at Austin, USA

##### Project: Theoretical Analysis, Numerical Method and Model Test of Porous Media Tuned Liquid Damper,

#### MOST, Taiwan

- R&D novel liquid damper utilizing porous media for floating structures and high-rise buildings.
- Successfully obtained international patents in Japan, China, and Taiwan for the developed liquid damper.
- Implemented ACI code wind load calculation.
- Developed an innovative viscous-inviscid interaction algorithm for high-resolution local sloshing simulation,

resulting in a remarkable 90% reduction in computational costs.

#### **Postdoctoral Research Fellow | 2018 – 2019**

Department of Bioenvironmental Systems Engineering / Civil Engineering, National Taiwan University, Taiwan

##### **Project: R&D and Experimental Verification of Nonlinear Tuned Mass Dampers, MOST, Taiwan**

- Directed a research team in the generation of nonlinear track-TMD design, examination of specimen fabrication, and conducting large-scale shaking-table experiments within a two-month timeframe.
- Applied ACI code seismic evaluation.
- Successfully initiated a new project involving the coupling of CFD-DEM for simulating full-scale riverine levee breaches.

#### **Research Assistant | 2014 – 2018**

Department of Engineering Science and Ocean Engineering, National Taiwan University, Taiwan

##### **Project: Numerical Studies on Wakes of a Three-Dimensional Airfoil, MOST, Taiwan**

- Enhanced numerical skills to minimize significant errors on the trailing edge of 2D/3D airfoils and propellers.
- Achieved lower numerical cost in accurately locating the position of the wake center line.

##### **Project: Nonlinear Sloshing Analysis by Regularized Boundary Integral Methods, MOST, Taiwan**

- Created an innovative Boundary Integral Method (BEM) that significantly improved numerical accuracy and stability in solving potential flows, resulting in an impressive efficiency gain of 86%.
- Characterized nonlinear sloshing behavior and applied API 650 code for sloshing evaluation.

## **Patents**

---

1. **Wen-Huai Tsao** and Wei-Shien Hwang. “*Tuned Liquid Dampers with Porous Media*,” Japan Patent #3217982, issued August 22, 2018.
2. **Wen-Huai Tsao** and Wei-Shien Hwang. “*Tuned Liquid Dampers with Porous Media*,” China Patent #ZL20182 0503987.2, issued January 18, 2019.
3. **Wen-Huai Tsao** and Wei-Shien Hwang. “*Tuned Liquid Dampers with Porous Media*,” Taiwan Patent #M564058, issued July 21, 2018.

## **Academic Service**

---

### **Invited Talks**

- Civil and Environmental Engineering Seminar, LSU in September 2022
- *Proteus* Workshop, LSU Center for River Studies in July 2021
- Ocean Engineering Group Seminar, UT Austin in June 2021, January 2021, June 2020, January 2020
- Environmental and Water Resources Engineering Group Seminar, UT Austin in September 2020, February 2020

### **Journal Reviewers**

- Mechanical Systems and Signal Processing; Structures; Engineering Computations; International Journal of Structural Stability and Dynamics
- Ocean Engineering; China Ocean Engineering; Marine Pollution Bulletin

### **Professional Organizations**

- Member of ASCE EMI Fluid Dynamics Committee

## **Teaching Tendency**

---

### **Undergraduate Courses**

Structural theory; Fluid mechanics; Ocean engineering; FE exam exercise; Programing bootcamp

### **Graduate Courses**

Dynamics of structures; Structural control theory; Computational methods for potential flows

## **Teaching Experience**

---

### **Guest Lecturer | CE2200 Fluid Mechanics | fall 2023**

Department of Civil and Environmental Engineering, Louisiana State University

- Lecture 1 courses on introduction of fluid mechanics

### **Guest Lecturer | Software Carpentry | summer 2022, summer 2023**

Department of Civil and Environmental Engineering, Louisiana State University

- Lecture 2 courses on Automatic Tasking with Unix Shell, Programing with Python, Version Control with Git

**Guest Lecturer | CE7700 Computational Methods for Coastal and Riverine Mechanics** | spring 2022, spring 2023

Department of Civil and Environmental Engineering, Louisiana State University

- Lecture 2 courses on boundary element method for potential flows

**Guest Lecturer | CE7430 Structural Design for Dynamic Loads** | spring 2022

Department of Civil and Environmental Engineering, Louisiana State University

- Lecture 1 course on passive structural control theory: tuned mass damper and tuned liquid damper

**Guest Lecturer | CIE1013 Applied Mechanics** | spring 2018

Department of Civil Engineering, National Taiwan University

- Lecture 2 courses on statics, including dry friction force on flat belts, wedges, pivots, etc.

**Teaching Assistant | CIE5058 Railway Engineering** | spring 2011, spring 2013

Department of Civil Engineering, National Taiwan University

- Introduce fundamentals of railway dynamics and host weekly office hours

**Teaching Assistant | ESOE5045 Dynamics of Structures** | fall 2010, fall 2011

Department of Engineering Science and Ocean Engineering, National Taiwan University

- Host weekly office hours and topic review sessions

## ***Honors & Awards***

---

- Southeastern Conference Emerging Scholar, Louisiana State University, USA, 2021
- Postdoctoral Research Abroad Scholar, Ministry of Science and Technology, Taiwan, 2019

## ***Additional Information***

---

Citizenship: Taiwan

FE exam passed

Languages: Mandarin Chinese (native), English (fluent)

YMCA basketball volunteer coach
